Good Afternoon:

How are you? With the removal activities at the Niagara Falls Boulevard Site, the Steelworks Industrial Park Fire in Lackawanna (which a few members of my team and I responded to) and the holiday, it has been very hectic. Attached are the draft soil results and the gamma survey figure for the section of the church property we assessed. Fortunately, we saw no gamma readings above normal background readings and there were no soil results exceeding action limits. Please let me know if you have any questions regarding this data.

As far as an update on the Niagara Falls Boulevard Site removal action, we have been removing contaminated soil from a large area behind the bowling alley and staging for disposal. We are also in the process of rebuilding the office area inside of Greater Niagara Building Center. I will be at the site until December 19th and the overall site activity will temporarily cease on December 21st for the Christmas break.

Hope all is well with you both and Merry Christmas if I do not hear from you.

Importance: High

Good Evening:

I wanted to reach out to you both regarding the next proposed step with the garage.

- On Thursday, September 15th, we will need to drill two core holes in the areas designated this past week.
- On Friday, September 16th we will collect the soil samples.

Please let me know how you would like me to handle access to the building.

Thanks.

Regards,

Eric

Subject: First Assembly Garage

Good Evening:

Everything went well with the garage. All locked up. We have two spots identified to perform soil sampling eventually.

Thanks for all your help today, Debbie!!!

Subject: Garage Key

Good Morning Mark:

How are you? We are back at the site. We are supposed to have the subcontractor come out and do the mark out in the garage this afternoon. Would you be able to drop off the key this morning? I left you voice mail as well.

Thanks

Regards,

Eric
